R topics documented:

Holidays-package .................................................. 1

Index ................................................................. 3

Holidays-package Supplies holiday data to the TimeWarp package.

Description

This package is a data-only package that registers holidays with the TimeWarp package. The package has no visible functions or data; it works by calling registerHolidays() from its .onLoad() function.
Note

To create a package with custom holidays (or updated holidays for the holiday series defined in here), either modify the source code of this package, or copy commands from R/holidays.R into a new package.

Author(s)

Jeffrey Horner, Lars Hansen, Tony Plate
Maintainer: Tony Plate <tplate@acm.org>

See Also

From the TimeWarp package: holidays, registerHolidays, allHolidays.

Examples

# View counts of registered holidays by year
sapply(as.character(1998:2012), function(y)
        sapply(allHolidays(), function(h) length(holidays(y, h, silent=TRUE)))))
