<dusa.adrian@unibuc.ro>

Maintainer:
Adrian Dusa

dummyFunction Dummy function to pass the CRAN checks

dummyFunction(x)

Arguments

x Any type of input.

Details

As the package QCAGUI will be archived, after being merged back to the main package QCA, this is a temporary function to pass the CRAN checks. This was important because many of the functions from the previous version are now in the new version 2.5 of the package QCA, and possible namespace collisions could have happened.

Value

Same object x.
