Package ‘RVideoPoker’

February 19, 2015

Type Package
Title Play Video Poker with R
Version 0.3
Date 2012-06-20

Author Roland Rau
Cards were created by Byron Knoll and released into the public domain. They were downloaded from http://code.google.com/p/vector-playing-cards/downloads/detail?name=PNG-cards-1.2.zip on 2012-06-08. Byron Knoll stated in his blog that the cards were released by him into the public domain: http://byronknoll.blogspot.de/2011/03/vector-playing-cards.html
The backside of the cards were created by Roland Rau using the R-Logo.

Examples

cat("All meaningful examples would require a GUI. Hence this nonsense example.\nTypically, you would enter\nrvideopoker()\nto start a standard session.\nMost importantly: Have fun!\n")
Arguments
initbet  Argument initbet specifies the initial bet. The default value is 1 (like 1 cent)
blnce   Argument blnce specifies the initial balance, i.e. the initial amount of "money" you put into the game. The default value is 1000 (like 1000 cents)

Details
This is just a game. Don’t take it serious.

Value
No value returned. Function is used for its side effects.

Note
No further notes. Have fun, enjoy, and improve.
